Active Underbody Panel

Description

- Provides underbody air flow redirection that reduces vehicle aerodynamic drag and lift.

Research & Development Focus

- Application:
- Passenger car
- C_D (coefficient of drag) reduction
- C_L (coefficient of lift) reduction
- Actuator technology under development

C_D benefit (counts)	Fuel savings (mpg)	CO_2 savings (g/km)	Mass equivalent (kg)
9-17	0.21	2.53	41
