Active Aerodynamics - Products

Description

- A suite of aerodynamic products focused on minimizing vehicle drag to improve fuel economy and reduce emissions.

Research & Development Focus

- Active aerodynamic products in production and development:
  - Active Grille Shutter (Since 2013; 15 program awards)
  - Visible Active Grille Shutter (production in Q2 2016)
  - Active Front Deflector (production in 2018)
  - Active Underbody Panel (in development)
  - Active Tailgate Panel (under investigation)
  - Active Liftgate Spoiler (under investigation)
  - Active Rocker Panels (under investigation)
  - Active Wheel Spats (under investigation)
- Extensive actuation and kinematic know-how
- Complete vertical integration
  - Class-A components
  - Molding & assembly
  - Actuation
